October 1, 2001

To Whom It May Concern:

InfoTech Niagara is pleased to support the broad community effort to bring distributed video conferencing capabilities to Western New York. As a consortium representing this region's high tech industry, we see the value in having this capability in the community. We believe this platform will serve as a mechanism for greater educational opportunities in this area's high schools and colleges and as a new opportunity for continual workforce development, which is currently unavailable.

Sincerely,

Robert Richardson
Director, Chairman, Education/Workforce Development, InfoTech Niagara
